

About ColoSpace

ColoSpace is a leading provider of Colocation, Managed IT and Cloud Solutions. Its impressive customer list includes some of the world's largest financial services, healthcare, and high tech companies. ColoSpace specializes in delivering flexible solutions in secure, highly-available environments.

Services

Colocation

ColoSpace Data Centers are all SSAE18 SOC2 certified, N+1 or 2N redundant for all critical systems (power, cooling, and network infrastructure) and meet such regulatory requirements as HIPPA, PCI, FedRamp, NIST and ISO

- Power
- Shared Space
- Half Cabinet
- Bandwidth
- Full Cabinet
- Cage Space

Managed Services

Let ColoSpace provide your infrastructure as a service, so you can reduce costs and have an industry leader help your business grow. Solutions are à la carte and have a "pay as you grow" pricing model.

Server Management

- Windows Server
- Linux (LAMP) Server

Cloud Solutions

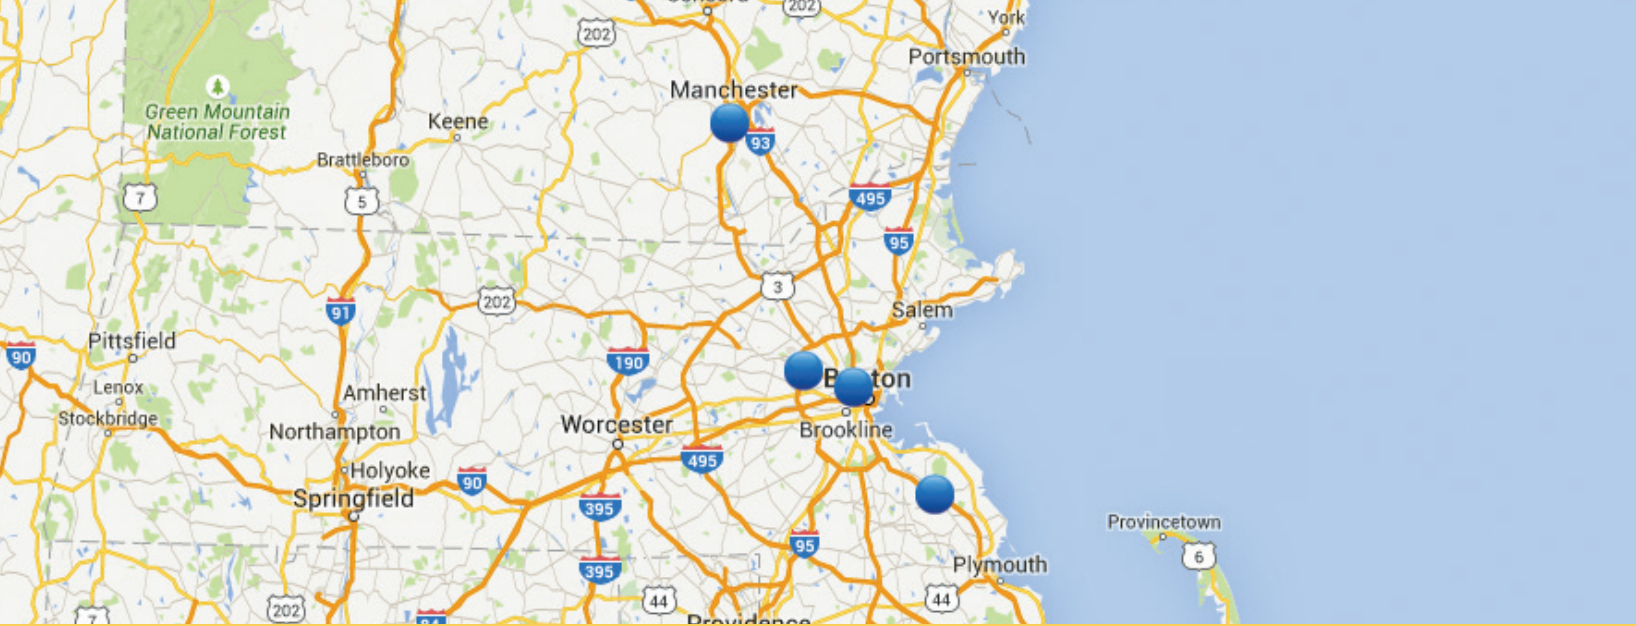

Expert management, scalability, and cost savings on highly available, redundant, and secure ColoSpace infrastructure with ColoSpace OnCloud or choose to utilize our Hybrid, Private or Managed Public Cloud solutions.

ColoSpace OnCloud

- Computing
- Storage
- Security
- Disaster Recovery
- Backup
- Desktop-as-a-Service

Other Cloud Services

- Hybrid Cloud
- Private Cloud
- Managed AWS/Azure
- OnCloud-2-Go Cloud Migration

Locations

ColoSpace currently owns and operates 4 Data Center locations. A major differentiating factor is ColoSpace's metro-Ethernet Layer 2 Network which interconnects each data center, allowing customers to receive a secure layer 2 Ethernet connection at each of our sites for a lower cost than traditional telecommunications providers.

ColoSpaceData Centers are easily accessible and conveniently located near major highways. All facilities have a 2N ups redundant infrastructure, are SSAE18 SOC2 certified, and are compliant with HIPAA, PCI, and many more.
